

1. MAIN USER WORKFLOW & ACCESS FLOW

2. NODE.JS MIDDLEWARE SUBSYSTEM CONNECTIONS

3. INDEPENDENT VIDEO INGESTION & DISCOVERY PATHS

Camera Streams: RTSP / HTTPS

Transactional: PostgreSQL

Live Viewing: WebRTC / HLS

Geospatial: PostGIS

AI Processing: AI Model API

Cache State: Redis

Events: Apache Kafka

Search Engine: OpenSearch

Architectural Note: Existing camera infrastructure is integrated through a centralized middleware layer. The platform does not replace existing camera infrastructure. AI processing and live browser viewing operate on separate, decoupled streams.
